Part A: Explanatory Notes Pursuant to Financial Reporting Standard 134 ("FRS 134") and Revised Guidelines on Financial Reporting for Licensed Institutions (BNM/GP8) Issued by Bank Negara Malaysia

A1. Basis of Preparation

The audited condensed financial statements for the 4th quarter and the financial year ended 30 June 2007 of the Group and of the Bank have been prepared in accordance with the requirements of FRS 134: Interim Financial Reporting and Chapter 9, part K of the Listing Requirements of Bursa Malaysia Securities Berhad. The audited condensed financial statements should be read in conjunction with the audited financial statements for the year ended 30 June 2006. These explanatory notes attached to the audited condensed financial statements provide an explanation of events and transactions that are significant to an understanding of the changes in the financial position and performance of the Group since the year ended 30 June 2006.

The accounting policies and methods of computation applied by the Group and the Bank are consistent with those adopted in the previous years except for the adoption of the following FRS effective from the financial periods beginning 1 July 2006:

FRS 2	Share-based Payment
FRS 5	Non-current Assets Held for Sale and Discontinued Operations
FRS 101	Presentation of Financial Statements
FRS 102	Inventories
FRS 108	Accounting Policies, Changes in Estimates and Errors
FRS 110	Events after the Balance Sheet Date
FRS 116	Property, Plant and Equipment
FRS 121	The Effects of Changes in Foreign Exchange Rates
FRS 127	Consolidated and Separate Financial Statements
FRS 128	Investments in Associates
FRS 131	Interests in Joint Ventures
FRS 132	Financial Instruments: Disclosure and Presentation
FRS 133	Earnings Per Share
FRS 136	Impairment of Assets
FRS 138	Intangible Assets
FRS 140	Investment Property

The adoption of FRS 5, 101, 102, 108, 110, 116, 121, 127, 131, 132, 133 and 136 does not result in significant changes in accounting policies of the Group. The principal effects of the changes in accounting policies resulting from the adoption of the other new and revised FRS's are discussed below:

(a) FRS 2: Share-based Payments

Prior to 1 January 2006, no compensation expense was recognised in profit or loss for share options granted. The Group and the Bank recognised an increase in share capital and share premium when the options were exercised. Upon the adoption of FRS 2, the total fair value of share options granted to employees is recognised as an employee cost with a corresponding increase in the share option reserve within equity over the vesting period.

The Group has applied FRS 2 in accordance with its transitional provisions which allow this change in accounting policy to be applied to share options that were granted after 31 December 2004 but had not yet vested on 1 July 2006. The application is retrospective and accordingly, certain comparatives have been restated, and the effects on the balance sheets as at 30 June 2006 and income statements for the year ended 30 June 2006 are disclosed in Note A28.

MALAYAN BANKING BERHAD
(3813-K)
(Incorporated in Malaysia)

A1. Basis of Preparation (contd.)

(b) FRS 101: Presentation of Financial Statements

Prior to 1 July 2006, minority interests at the balance sheet date were presented in the consolidated balance sheet separately from liabilities and equity. Upon the adoption of the revised FRS 101, minority interests are now presented within total equity. In the consolidated income statement, minority interests are presented as an allocation of the total profit or loss for the year. A similar requirement is also applicable to the statement of changes in equity. The revised FRS 101 also requires disclosure, on the face of the statement of changes in equity, total recognised income and expenses for the year, showing separately the amounts attributable to equity holders of the Bank and to minority interests.

Prior to 1 July 2006, the Group's share of taxation of associates and jointly controlled entities accounted for using the equity method was included as part of the Group's income tax expense in the consolidated income statement. Upon the adoption of the revised FRS 101, the share of taxation of associates and jointly controlled entities accounted for using the equity method are now included in the respective shares of profit or loss reported in the consolidated income statement before arriving at the Group's profit or loss before tax.

Derivative assets and derivative liabilities have also been disclosed separately (from other financial assets and financial liabilities) in line with FRS 101.

These changes in presentation have been applied retrospectively and as disclosed in Note A28, certain comparatives have been restated. These changes in presentation has no financial impact on the Bank's financial statements.

(c) FRS 128: Investment in Associates and Interpretation Committee Interpretation 112 Consolidation – Special Purpose Entity

In prior year, Mayban Venture Capital Company Sdn Bhd ("MVCC") was treated as a subsidiary by virtue of the RM2 ordinary shares held by the Group, through its subsidiary, Mayban Ventures Sdn Bhd ("MVSB"). Funding for its operations is raised through the issuance of 150,000 units of redeemable non-convertible preference shares ("RUCPS") at RM1.00 each with a premium of RM999.00 per RUCPS. The Group, through MVSB has subscribed to approximately 33.33% of the RUCPS amounting to RM50,000,000. In the current financial year, MVCC is treated as an associate and equity accounted by the Group in accordance with FRS 128 and Interpretation Committee Interpretation 112 Consolidation – Special Purpose Entity which are effective for the Group from the financial year beginning 1 July 2006 onwards. When MVCC is equity accounted in the current year's financial statements, only the Group's share of the beneficiary interests of approximately 33.33% in the profit or loss of MVCC is recognised in the financial statements. The effects of the change in treatment of MVCC are accounted for retrospectively and are disclosed in Note A28.

(d) FRS 140: Investment Property

The adoption of this new FRS has resulted in a change in the classification of certain land and buildings owned by the life insurance business. Previously, in line with FRS 203 Life Insurance Business (formerly known as MASB Standard 18), land and buildings owned by the life insurance business are classified as investment properties, notwithstanding that they are substantially occupied for use by, or in the operations of the Group.

With the adoption of FRS 140 and consequential amendment to FRS 203, owner-occupied property cannot be classified as investment property. Accordingly, land and buildings previously classified as investment properties have been reclassified and accounted for as property, plant and equipment.

A1. Basis of Preparation (contd.)

(d) FRS 140: Investment Property (contd.)

As a result of the adoption of FRS 140, investment properties which are held for rental to external parties are stated at fair value and any gain or loss arising from a change in fair value is recognised in the income statement. Prior to 1 July 2006, investment properties were stated at cost less impairment losses, if any.

The Group has applied FRS 140 in accordance with the transitional provisions. The change in accounting policy has had no impact on amounts reported for 30 June 2006 or prior periods. Instead, the changes have been accounted for by restating certain opening balances of the Group as at 1 July 2006 as disclosed below and Note A28.

(e) FRS 138: Intangible Assets

The adoption of this new FRS has resulted in a change in the classification of certain computer software. Previously, computer software used by the Group and the Bank was classified as computer and peripherals and was depreciated over their estimated useful life of four (4) years.

Upon the adoption of FRS 138, computer software which is not an integral part of the computer hardware is classified as intangible assets and amortised over its finite useful lives ranging from 3 to 5 years. The application is retrospective and accordingly, certain comparatives have been restated. The adoption of this FRS only has effects on reclassification of balance sheet captions, which are disclosed in Note A28.

(f) BNM's Circular on Handling Fees

The adoption of BNM's Circular on Handling Fees dated 16 October 2006 resulted in the Group and the Bank capitalising the handling fees paid for originating hire purchase loans in the balance sheet and amortising the amount to the income statement over the life of the loans with retrospective effect. The amount amortised is offset against interest income earned on the hire purchase loans. Previously, such handling fees were recognised in the income statement as a reduction in interest income when incurred. The effects of the adoption of this BNM circular are set out in Note A28.

A1.1 Significant Accounting Estimates and Judgments

The preparation of financial statements requires management to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets, liabilities, income and expenses. Although these estimates are based on management's best knowledge of current events and actions, actual results may differ from those estimates. Critical accounting estimates and assumptions used that are significant to the financial statements, and areas involving higher degree of judgement and complexity, are as follows:

(i) Fair Value Estimation of Securities Held-for-trading (Note 8(i)), Securities Available-for-sale (Note 8(ii)) and Derivative Financial Instruments (Note A10)

The fair value of securities and derivatives that are not traded in an active market are determined using valuation techniques based on assumptions of market conditions existing at the balance sheet date, including reference to quoted market prices and independent dealer quotes for similar securities and discounted cash flows method.

(ii) Valuation of Investment Properties:

The measurement of the fair value for investment properties is arrived at by reference to market evidence of transaction prices for similar properties and is performed by professional independent valuers.

(iii) Impairment of Goodwill

The Group tests annually whether the goodwill that has an indefinite life has suffered any impairment by measuring the recoverable amount of the goodwill based on the value-in-use method, which requires the use of estimates of cash flow projections, growth rates and discount rates. Changes to the assumptions used by management, particularly the discount rate and the terminal growth rate, may significantly affect the results of the impairment.

(iv) Impairment of Other Intangible Assets

The Group's and the Bank's intangible assets that can be separated and sold and have a finite useful life are amortised over their estimated useful life.

The determination of the estimated useful life of these intangible assets requires the Bank's management to analyse the circumstances, the industry and market practice and also to use judgment. At each balance sheet date, or more frequently when events or changes in circumstances dictate, intangible assets are assessed for indications of impairment. If indications are present, these assets are subject to an impairment review. The impairment review comprises a comparison of the carrying amount of the assets with its recoverable amount.

(v) Liabilities of Insurance Business

The actuarial estimate of future contingent policy liabilities is computed in accordance with the standards and basis prescribed under the Insurance Act and Regulations, and uses a level net premium methodology with allowances for acquisition costs through the application of a zilmer or full preliminary term adjustments, whichever produces higher reserves.

For general claims, reserve is made upon notification of a new claim where the potential liability will be assessed based on information available. Where little or no information is available, a "blind" reserve will be used. The blind reserves are based on class of business and are reviewed annually in line with Bank Negara Malaysia guidelines. As and when more information becomes available regarding a claim, the reserve is amended accordingly.

A1.1 Significant Accounting Estimates and Judgments (contd.)

(vi) Deferred Tax and Incomes Taxes

The Group and the Bank is subject to income taxes in many jurisdictions and significant judgment is required in estimating the provision for income taxes. There are many transactions and interpretations of tax law for which the final outcome will not be established until some time later. Liabilities for taxation are recognized based on estimates of whether additional taxes will be payable. The estimation process includes seeking expert advice where appropriate. Where the final liability for taxation is different from the amounts that were initially recorded, the differences will affect the income tax and deferred tax provisions in the period in which the estimate is revised or the final liability is established.

(vii) Allowances for Bad and Doubtful Debts

The Group and Bank review the doubtful loans, advances and financing at each reporting date to assess whether allowances for impairment should be recorded in the financial statements. In particular, judgement is required in the identification of doubtful loans and the estimation of realisation amount from the doubtful loans when determining the level of allowance required.

The Group and Bank have adopted certain criteria in the identification of doubtful loans, which include classifying loans as non-performing when repayments are in arrears for more than three (3) months (one (1) month after maturity date for trade bills, bankers' acceptances and trust receipts). Specific allowances for doubtful loans are provided after taking into consideration of the values assigned to collateral. The values assigned to collateral are estimated based on market value and/or forced sales value, as appropriate and conforms to BNM guidelines. In addition to the specific allowances made, the Group and Bank also make general allowance against exposure not specifically identified based on a certain percentage of total risk-weighted assets for credit risk. Such estimates are based on assumptions about a number of factors and actual results may differ, resulting in future changes to the allowance.

In accordance with FRS 3, this excess was recognised immediately in the income statement.

A24. Commitments and Contingencies and Off-Balance Sheet Financial Instruments (contd)

Market Risk

Market risk is the potential change in value caused by movement in market rates or prices. The contractual amounts provide only a measure of involvement in these types of transactions and do not represent the amounts subject to market risk. Exposure to market risk may be reduced through offsetting on and off-balance sheet positions. As at 30 June 2007, the amount of contracts that was not hedged in the Group and the Bank and, hence, exposed to market risk was RM135.9 million (30 June 2006: RM68.8 million).

Credit Risk

Credit risk arises from the possibility that a counter-party may be unable to meet the terms of a contract in which the Group and the Bank has a gain in a contract. As at 30 June 2007, the amount of credit risk in the Group and the Bank, measured in terms of the cost to replace the profitable contracts, was RM159.1 million (30 June 2006: RM160.6 million). This amount will increase or decrease over the life of the contracts, mainly as a function of maturity dates and market rates or prices.

Part B – Explanatory Notes Pursuant to Appendix 9B of the Listing Requirements of Bursa Malaysia Securities Berhad

B1. Performance Review

The Group's pre-tax profit for the financial year ended 30 June 2007 registered an increase of 9.42% compared to the corresponding period. The growth was largely driven by improvements in net interest income supported by expansion in the insurance and credit card businesses as a result of the acquisition of Malaysia National Insurance Berhad (MNI) and the Malaysian cards business of American Express. Allowance for losses on loans, advances and financing was also lower by 15.5% compared to the corresponding period on the back of a gain on disposal of NPL of RM257.7 million.

The attributable profit after tax of the Group for the financial year ended 30 June 2007 increased by 14.64% or RM406 million compared to the corresponding period.

B2. Variation of Results Against Preceding Quarter

The Group registered an increase in attributable profit after tax from RM745.6 million for the preceding quarter to RM1,076.6 million for the quarter just ended. The better profit was due mainly to higher operating profit and lower loan loss provisioning compared to the preceding quarter.

B3. Prospects

While cognizant of the challenges presented by the volatility of the current financial market, we believe we have a well-established risk management framework to cope with these challenges and at the same time capitalize on the opportunities.

The Group also expects the business environment on the domestic front supported by the accelerated launch of projects under the 9th Malaysian Plan and the resilience of the Malaysian economy to remain conducive for the Group. The Group therefore, expects to record a better performance for the financial year 2007/2008.

B9. Deposits and Placements of Financial Institutions and Debt Securities

Please refer to note A12 and A13.

B10. Off-Balance Sheet Financial Instruments

Please refer to note A24.

B11. Changes in Material Litigation

- (a) In 2005, a subsidiary, Mayban Trustee Berhad ("MTB") and eleven other defendants were served with a writ of summons by ten bondholders for an amount of approximately RM157.8 million. MTB was alleged to have acted in breach of trust and negligence in its capacity as Trustee for the bonds issued. The legal suit is pending court hearing and the liability amount, if any, is subject to the court's decision.

During this last financial year, MTB had proceeded to file a counter-claim on a full indemnity basis against one of the bondholders and two of the other defendants to the suit.

The contingent liability is covered by an existing Banker Blanket Bond Policy between the Bank and a subsidiary, Mayban General Assurance Berhad ("MGAB"), which had entered into a facultative reinsurance contract for an insured sum of RM150 million with three other re-insurers.

No provision is made in the Group's financial statements.

- (b) In 2004, Takaful Nasional Berhad ("TN"), now a subsidiary of Maybank, commenced a civil suit against a borrower ("the 1st Defendant") and three guarantors for the sum of approximately RM25.8 million, following the recall of the relevant facility which was preceded by the 1st Defendant's failure to pay monthly instalments.

The 1st Defendant counter-claimed for loss and damage amounting to approximately RM284 million as a result of TN's alleged failure to release the balance of the facility of RM7.5 million. It is alleged that the 1st Defendant was unable to carry on with its project and therefore has suffered loss and damage. TN are proceeding with their claim and are resisting the 1st Defendant's counter-claim.

TN are of the view that they have a good chance of succeeding in the action and in securing a dismissal of the 1st Defendant's counter-claim.

Other than that stated above, the Group and the Bank do not have any other material litigation that would materially and adversely affect the financial position of the Group and the Bank.

If approved, the final dividend will be paid on **15 November 2007** to Depositors whose names appear in the Record of Depositors on **1 November 2007**.

B13. Earning Per Share (EPS)

Basic

The basic EPS of the Group is calculated by dividing the net profit for the quarter and the financial year attributable to ordinary share holders of the parent by the weighted-average number of ordinary shares in issue during the quarter and the financial year respectively.

	4th Quarter Ended		Financial Year Ended	
	30 June 2007	30 June 2006	30 June 2007	30 June 2006

Basic earnings per share (sen)	<u>27.69 sen</u>	<u>22.15 sen</u>	<u>82.58 sen</u>	<u>73.57 sen</u>

Diluted

The diluted EPS of the Group is calculated by dividing the net profit for the quarter and the financial year attributable to ordinary share holders of the parent by the weighted-average number of ordinary shares in issue, which has been adjusted for the number of shares that could have been issued under the Maybank Group Employee Share Option Scheme.

In the diluted EPS calculation, it was assumed that the share options were exercised into ordinary shares. A calculation is done to determine the number of shares that could have been issued at fair value (determined as the average price of the Bank's shares during the quarter) based on the monetary value of the subscription rights attached to the outstanding share options. This calculation serves to determine the number of dilutive shares to be added to the weighted-average ordinary shares in issue for the purpose of computing the dilution. No adjustment was made to the net profit for the quarter.
